Languages and Tools: C++, Python, R, MySQL, Excel, Microsoft Suite, Tableau, LookerStudio, Git

Libraries: pandas, numpy, seaborn, matplotlib, scikit-learn, ggplot, caret, dplyr

WORK EXPERIENCE

Data Journalist, Summer Data Editor

The Michigan Daily

February 2024 – Present

Ann Arbor, MI

- Extract, research, and analyze data using tools like Excel and Python to synthesize meaningful insights and create high-impact stories that engage and inform U-M campus life through data-driven storytelling and research
- Produce compelling data visualizations with Tableau, R, Flourish to communicate insights from complex data
- Compiled 1,600 data points from 24 years of datasets for a 3-part U-M admissions series; received over 20,000 impressions

Undergrad Research Assistant

University of Michigan - Tiger Behavior Modeling Research

September 2023 – April 2024

Ann Arbor, MI

- Created standardized ethogram, reviewed literature and developed protocol design for researching ex-situ behavior
- Performed ANOVA, Shannon's Diversity Index, and Yuen's t-test analyses using BORIS live observation software and R to analyze patterns in tiger pacing and behavioral diversity between indoor and outdoor zoo enclosures

Content and Sales Manager

Career in STEM

August 2022 – August 2024

Remote

- Catalyzed award-winning company by initiating relationships with top educators, managing sales relations and leading partnership projects (Innovation World, NASA) to promote STEM accessibility for 3 million students
- Conceptualized, researched and developed 30+ immersive curricula to help students discover STEM career paths
- Drove key business development and strategic operations by working directly with CEO to coordinate cross-partnership projects, draft articles on company initiatives and manage platform of 340 student contributors

PROJECT EXPERIENCE

Project Manager, Data Analyst | *Ballotpedia*

January 2025 – April 2025

- Led team of six analysts to clean, analyze, and visualize Ballotpedia's 30,000 data points from the 2024 elections
- Utilized MySQL and Excel to perform analyses on outspent incumbency, party outcomes, voting margins, and more, developing standardized cleaning procedures and reusable queries for Ballotpedia's Editorial team
- Created KPIS, visualizations and interactive dashboard using Datawrapper and Tableau
- Translated insights into cohesive narrative in 30 page final report for publication
- Built a stacked classification model to forecast election outcomes leveraging R's caret, neuralnet, kernlab, and c50 to implement logistic, SVM, KNN, ANN, and decision tree models; achieved 87% accuracy and 96% sensitivity

Consulting Project Manager, Technical Consultant | *TransTech Social Enterprises*

August 2024 – December 2024

- Led team to conduct comprehensive analysis of 7000 community member data points using Python and Excel
- Derived and compiled insights into an automated LookerStudio dashboard to direct TransTech's strategic planning
- Advised executive board using targeted outreach initiatives backed by visual storytelling and analysis report

Nonprofit Consultant | *PwC and Extern*

August 2024 – October 2024

- Gained in-depth knowledge of nonprofit sectors, applying new skills to funding acquisition for YouthBuild Lake County
- Researched Illinois's philanthropic landscape to identify key trends and devise targeted fundraising and outreach strategies
- Delivered presentation outlining research, five tailored donor profiles and final recommendations to key board members

LEADERSHIP AND EXTRACURRICULARS

- Michigan Data Consulting - Vice President
- FEMMES Executive Board - Data Manager
- Poker Power Ambassador
- Sanger Leadership Crisis Challenge 2025
- Tech Innovation Jam 2024 - Project Manager
- Chess
