EDUCATION

University of Michigan – LSA Honors

Aug 2023 - May 2027

Statistics B.S. and Data Science B.S. GPA: 3.871

Ann Arbor, MI

- *Relevant Coursework:* Data Structures & Algorithms, Advanced Analytics in Management Consulting, Applied Linear Algebra, Discrete Mathematics, Microeconomics, Statistics and AI, Mathematics of Finance, Accounting, Probability
- *Additional Courses:* Bloomberg Financial Concepts, Inside LMVH, Accenture Data Analytics and Visualization

TECHNICAL SKILLS

Languages and Tools: C++, Python, R, SQL, Excel, Power BI, Tableau, VS Code, Git/GitHub, Alteryx

Libraries: pandas, seaborn, matplotlib, scikit-learn, TensorFlow, ggplot, caret, kernlab, neuralnet, C50

WORK EXPERIENCE

Analytics Intern - Corporate Retail Operations

May 2025 – July 2025

Meijer

Grand Rapids, MI

- Leveraged business analytics and predictive modeling to optimize the pilot performance of a third-party analytics platform using sci-kit learn, statsmodels, Power BI, and SQL in Teradata
- Conducted statistical analyses to uncover trends between 22 market KPIs, informing on how to drive KPI performance
- Developed Python scripts in Microsoft Fabric notebooks for sustainable replication of workflows in lagged correlations, underperformance detection, SHAP values analysis, and more
- Created Power BI report to visualize weekly inventory management KPIs underperformance across 27 markets

Data Journalist, Summer Data Editor

Feb 2024 – Present

The Michigan Daily

Ann Arbor, MI

- Research, extract, and analyze data in Excel and Python to create high-impact stories through data-driven storytelling
- Communicate complex data trends with visual narratives using Datawrapper, Flourish, ggplot, seaborn, and matplotlib
- Lead data editorial process from pitch to publication, improving stories' narrative structure and analytical accuracy
- Reached over 30,000 impressions and received Wasserstein Award and Lipsey Merit Award for Multimedia Reporting 2025

Nonprofit Consultant

Aug 2024 - Oct 2024

PwC and Extern

Remote

- Gained understanding of nonprofit sector and strengthened market analysis and stakeholder engagement skills, applying new knowledge to grant funding acquisition strategies for YouthBuild Lake County
- Researched Illinois's philanthropic landscape to find key trends and develop targeted fundraising and outreach techniques
- Identified five high-priority donor profiles using segmentation analysis and delivered final presentation outlining data-driven recommendations to board members

PROJECT EXPERIENCE

Vice President | Michigan Data Consulting

Jan 2025 – Present

- Co-founded data-driven tech consulting club and led team of six analysts to analyze 32,000 data points from the 2024 elections, informing editorial-focused insights on campaign finance data for Ballotpedia
- Utilized MySQL and Excel to develop 12 standardized data cleaning and analysis scripts with reusable queries
- Created data visualizations and an interactive dashboard using Datawrapper and Tableau; translated insights into a 30 page final report for publication
- Built a stacked classification model to forecast election outcomes using caret and kernlab in R (see portfolio)

Project Manager, Technical Consultant | TransTech Social Enterprises

Sep 2024 – Dec 2024

- Led team to conduct comprehensive EDA over 8000 community member data attributes using pandas, matplotlib, and Excel
- Implemented automated workflows for data cleaning + transformation and built reproducible EDA pipelines in Python
- Integrated multi-source datasets and compiled insights into an interactive Looked Studio dashboard
- Translated data-driven insights to executive board through visual storytelling and analysis report, providing actionable recommendations to direct TransTech's strategic planning in outreach, member retention, and program training

Data Analyst | Personal Projects (see portfolio)

June 2024 – Present

- Build data-driven analysis and modeling projects to explore and develop understanding of financial concepts:
- (i) Comparable companies financial model to benchmark multiples and determine valuation ranges with Yahoo Finance data
- (ii) Portfolio optimization model to maximize Sharpe ratio by calculating covariance matrix, stds, and expected returns
- (iii) Feed-forward binary classification churn model using Keras, ReLU activations, sigmoid output, applied ROC curve analysis, and Youden's J statistic

LEADERSHIP AND EXTRACURRICULARS

Activities: Michigan Business Women, FEMMES - Data Manager, Poker Power Ambassador, Sanger Crisis Challenge 2025

Interests: Piano pop arrangements, paper flower-making, prose poetry, wildlife blogging, chess openings
